

BORON CARBIDE HAND STONES

ULTRA HARD TYPE M.C.

PPE type M.C. Series Hand Stones are a new concept stone design for polishing, deburring and surface finishing. The main element in these stones is Boron Carbide which is an extremely hard element next to diamond in the mohr scale. The Boron Carbide has been combined with a tough bonding material that allows the individual crystals to float freely, allowing maximum cutting action. The stones are blackish-green in color.

The M.C. Stones are superior to regular stones made of silicone carbide, aluminum oxide, or molded boron carbide hand stones. Even compared to artificial Ruby stones which are sintered aluminum oxide and not bonded, our M.C. Stones prove their superiority.

**9 GRITS AVAILABLE
FROM 130 TO 2000**

- CHARACTERISTICS -

- Cuts carbide, ceramic, steel, beryllium, brass, bronze and aluminum.
- Break-resistant, won't break if dropped.
- Will not clog, wipes clean instantly.
- Retains shape, but can be dressed on grinding wheel.
- 9 grits available from 130 to 2000.
- Color coded for easy identifications.

- USES FOR M.C. STONES -

- Dressing carbide tools after grinding.
- Polishing on plastic and die cast molds.
- Finishing on hardened steel or carbide stamping dies and tools.
- Cuts to special shapes for unusual operations with a diamond slitting wheel.

- PRICES FOR STONE SETS -

- Set A consists of 1 each of all the 180 grit stones (5).
Part No. BC-A \$176.25
- Set B consists of 1 each of all the 360 grit stones (5).
Part No. BC-B \$193.95
- Set C consists of 1 each of all the 750 grit stones (5).
Part No. BC-C \$247.15
- Set D consists of 1 each of all the Flat/Rectangle stones (9).
Part No. BC-D \$336.10
- Set E consists of 1 each of all the Square stones (9).
Part No. BC-E \$474.10
