

RATCHETING ADJUSTABLE WRENCH

2 LENGTHS - 2 JAW SIZES

This patented ratcheting adjustable wrench is made of Chrome Molybdenum Alloy steel with full precision hardening for double strength. The unique ratcheting design features a switch to change from standard adjustable to ratcheting adjustable wrench functions. Jaw housing pivots on return stroke allowing the jaws to open slightly before locking back down on the next bolt flat. This allows the wrench to ratchet around the bolt without losing the original size. Ratchet On/Off switch locks the head in place so it operates as a standard adjustable wrench or as a ratcheting adjustable wrench. The handle is made of Impact-resistant ABS.

SET TO SIZE

Ratchet On-Off button.

TORQUE IT

The thumb screw adjustment wheel is locked in place by the handle.

RATCHETS BACK

Pivoting the handle upward releases the adjustment wheel allowing jaws to open slightly and ratchet around the bolt head.

Initially adjust the wrench to fit the bolt head snugly.

Tighten the Bolt as normal. No need to remove the wrench and reset it.

Return wrench to original position. It releases the bolt head and ratchets around before clamping tight on the flats again.

FEATURES

- Patented Ratcheting Design.
- Two Jaw Sizes Available.
- Two Lengths Available.
- Chrome Molybdenum Alloy Steel.
- Double Strength Precision Hardened.
- Switches between normal and ratchet.
- Impact-resistant ABS Handle.
- Scale is laser etched for approx bolt size.

QUICK & EASY!
