TOPF090

Mini Grippers

These grippers are very small and light weight yet they are very powerful and robust. Hard coated gripper surface provides high wear resistance. Model TOPF091 includes grip detection sensor.

Large Gripper

These grippers are designed for gripping large sprues during injection molding. They are a short design with a large jaw opening. Dual action allows rapid cycle times, hard coated surface provides maximum wear resistance.

Compact Powerful Gripper

These grippers are designed for gripping the sprue during injection molding. The short design, very high closing force and coarse teeth give them excellent gripping capability. Includes grip sensor (PNP type).
