

FACESHIELDS

PROTECT YOUR FACE & NECK FROM FLYING DEBRIS, SPLASHES, ETC.

A MUST WHILE PURGING MOLDING MACHINES

A Safety Tip! A must when changing propane tanks on lift trucks per OSHA! Avoids flash freezing.

Faceshield headgear has a universal hole pattern that holds the faceshield firmly in place. Easy ratcheting headband for precise fit. Wrap-around cushioned headband gently hugs the natural shape of the head. Both crown and faceshield easily pivot up. The large faceshield provides additional protection from top, bottom and sides. The faceshield is made of .040" thick poly-carbonate to provide superior secondary impact protection and increased scratch resistance. Safety glasses or goggles should be worn at all times with the Faceshield.

Faceshield shown used with Element Safety Glasses.
