HOT OR COLD HOSES – MATERIAL HANDLING – ETC...

- Temperature range:
+480°F/-100°F
- Three sizes: 8-9-10
- Non-slip grip
- USDA/FDA Accepted
- 14" length overall

THREE SIZES
SMALL, MEDIUM
& LARGE

Insulated neoprene gloves are constructed of non-toxic synthetic neoprene rubber and an integral cotton jersey thermal liner. The Hi-Lo Temperature Gloves withstand brief contact with hot metals up to 480°F and cold contact to -100°F in hand area. Soft and flexible, firmly anchored cotton jersey liner provides unsurpassed insulation in a neoprene liquid-proof glove.

Hi-Lo Temperature Gloves feature a positive non-slip roughed grip, and a two-tone wear indicator to permit glove change-out before abrasion penetrates the shell. Available in three sizes to ensure proper fit for all, the Hi-Lo Temperature Gloves reduce the risk of burns and frost injuries with better ambient temperature recovery than any other insulated glove. USDA/FDA Accepted per 21 CFR, 170-199.
