

BODY COOLING WRAPS

NECK BAND -BACK WRAPS - WRIST WRAPS

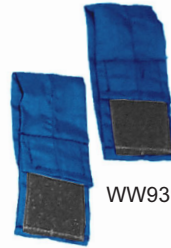

**NOT A NOVELTY.
THEY REALLY
WORK!**

NW909

BWM919,
BWL919

WW939

**Stays cooler and lasts
longer than any other
product available!**

NW909

FEATURES & BENEFITS

- Safely lowers core body temp.
- Stays cool all day.
- Reusable, hand-washable and designed to meet the needs of industry.
- **Approved for use in hazardous materials suits including Nomax and Tyvex overalls.**
- Will not absorb body toxins & does not break down in salt water (sweat).
- Just rinse and hang dry at the end of each day to ensure mold/mildew free use.
- Re-soak for 10-20 minutes in the morning to rejuvenate crystals for another full days use.
- Pre-washed and double stitched for strength and durability.
- Crystals have an effective use life between 1 1/2 to 2 years.
- Color: Green or Blue.

NOT ALL COOLING WRAPS ARE CREATED EQUAL

With the exception of PPE high quality cooling wraps there are no other products that we are aware of that don't use a agricultural or waste type polymer as a cooling medium. Ours WILL NOT absorb liquid wastes, toxins, oils, soaps, bacteria, perspiration, molds, etc.,. Always specify PPE cooling wraps.

Directions:

Initially soak neck band in water for 35-45 minutes (ice or ice water is never needed). As it soaks, distribute the crystals evenly throughout the neck tie allowing the crystals to absorb water equally and expand completely. Towel or drip dry and begin wearing.

Too much soaking will cause the crystals to overexpand through the fabric. If this occurs, allow the neck band to dry a little, rinse and you're ready to go! To keep the cooling wrap cool, simply flip the product over while it is on your body - approximately one turn every 40 to 60 minutes and it just keeps cooling. At the end of the day, rinse in clean water or hand wash with a mild soap and hang to air dry.

These cooling wraps are made with a poly/cotton blend exterior that is easy to keep clean and is filled with a special nontoxic crystal that rejects perspiration and other chemicals. Re-soaking the cooling band for 10-20 minutes rejuvenates it for another full day's use. May be used hundreds of times.

DON'T LAUGH WHEN YOU SEE HOW SMALL THE WRAP IS BEFORE YOU SOAK IT IN WATER!
