

HOT TIP SPRUE CLEANER

FOR CLEANING PLUGGED SPRUES

The Hot Tip Sprue cleaner is a quick heating flexible tool for melting thermoplastics from plugged sprues. When you squeeze the trigger the powerful heater heats the tip to 350°C (660°F) within seconds. Only hold the trigger long enough to get the tip up to temperature. On time should never exceed 12 seconds. Three Interchangeable tips make it ideal for a variety of different sprue types. Tips slide on and off the heated end and can be locked in place with the collar.
