

# STATIC ELIMINATOR

## FOR STATIC-FREE PRODUCT PROCESSING

### FEATURES:

- Highly effective up to 9 feet away.
- Non-Nuclear ion generation.
- Low operating costs.
- Wide angle of coverage.
- Highly accurate circuitry to balance flow of positive and negative ions.
- Variable speed fan for controlled ion flow.
- High profile airstream for unobstructed ion flow.
- Negligible ozone generation far exceeds OSHA safety requirements.

### SPECIFICATIONS:

- Dimensions: 13-1/2" w x 9" h x 9-1/2"d.
- Angle of coverage: 20° vertical plane, -30° (Horizontal Plane).
- Rated fan output, max = 320cfm (variable).
- Power consumption 3.0A @ 120V.
- Noise level (full speed) 59 dBA.

**SELF CONTAINED.  
NO COMPRESSED AIR  
SUPPLY REQUIRED.**

**MODEL #D320 Static Eliminator ..... \$926.00**  
**MODEL #T1246 Power Supply ..... \$301.00**

The Dynastat 320 Series is designed for permanent, production line installation where high volumes of ionized air are required. It contains twin centrifugal blowers which will provide 320 cubic feet per minute of ionized air. Measuring nominally 13-1/2" wide by 9" high by 9-1/2" deep the Dynastat 320 Series is supplied with mounting hardware for easy and permanent installation. It is mechanically shockproof and can be installed separately or in parallel depending on the area requiring protection.

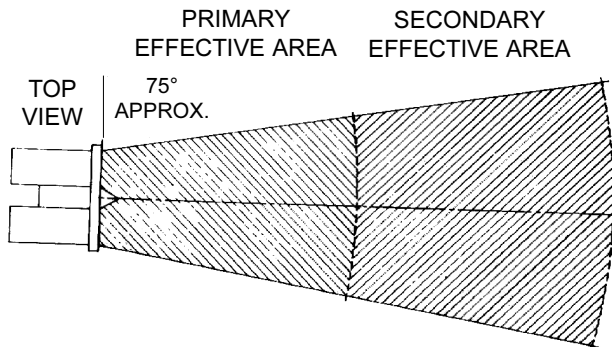

The Dynastat 320 Series is recommended for use in protecting sensitive electronic components against electrostatic discharge and in plastics, rubbers, film, glass, textiles and other industries where webs or parts are sizeable but not flat enough to require static neutralizing bars.

The 320 Dynastat Model II requires a T1246 Power Supply. One or two blowers can be operated from one power supply.
