- G. Two Blades Supplied: #B10 and #B20
- H. Delrin Molded Handle Model PRB-1

The PPE Rout-A-Burr PRB-2 was suggested by plastic molders who have used this tool successfully for several years. Our description cannot adequately explain the features or the fantastic way this tool performs. It does a terrific job cutting the exact amount of flash from a molded part by the amount of pressure applied by the user. It cuts internal or external radii in a single cut because the blade is free to rotate a full 360°. You must try one to believe it.

NOTE
THESE ARE NOT
BLADES MADE IN CHINA.
THESE ARE TOP
QUALITY!
