The Model HGC-K45 is a lower cost answer to trimming problems that require a heated gate cutter. However, this cutter is not as effective or efficient as our larger Model HGC-K10 due to the location of the heater blocks which are fastened directly on the cutting blades. This permits better heat transfer, higher temperatures and thus more effective cutting.

Fuse Types used:
Old Style (silver box): AGC-1
New Style (black box): GMA-1

CAUTION: USE HIGH TEMPERATURE GLOVES WHEN USING A PPE HEATED GATE CUTTER!
