GRIP-N® GLOVES
USE FOR HANDLING PARTS OR AS A WORK GLOVE

Handling injection molded parts or pipe on an oil rig, sheet metal cans on an assembly line or tools and materials in plant maintenance. USDA accepted "Grip-N" gloves deliver the best total value in industrial hand protection. That's because "Grip-N" gloves offer an equal ration of the four most desired features in the purchase of any glove...comfort, durability, grip and finger dexterity...and at a cost as low or lower than ordinary cotton gloves!

Features
Unique PVC “N-Thread” Coating.
No seams
Reversible
Easily laundered

Benefits
Non-skid grip. Outstanding abrasion resistance.
Superior finger dexterity. Will not chafe or tear. Comfortable in any climate.
Can be worn on either hand. Longer life with four usable surfaces instead of two. No sorting before or after washing.
 Virtually no shrinkage (when washed in alkaline or other detergent solution).

Features
Both sides coated

Benefits
A GREAT GLOVE!
A GREAT VALUE!

VIBRATION DAMPENING GLOVES
USE WHEN: Sanding, Grinding, Polishing, etc.

Vibration Dampening Gloves
These gloves are padded with a layer of vibration dampening polymer. Specially compounded, formed-chloroprene coated, seamless-lined gloves. Good for protection from repetitive impact and work with pneumatic vibrating tools. Ergonomic design offers both comfort and flexibility. Repetitive trauma associated with excessive vibration to the hands is a big problem in North America. Employees develop many symptoms associated with hand-arm vibration syndrome (HAVS). Hand-arm vibration is vibration transmitted into your hands and arms when you use hand-held powered work equipment. Too much exposure to hand-arm vibration can cause hand-arm vibration syndrome (HAVS) and carpal tunnel syndrome.

HAVS affects the nerves, blood vessels, muscles and joints of the hand, wrist and arm. It can become severely disabling if ignored.
