## MASTER Quality Construction Means Rugged Reliability

The Master Heat Gun is the result of more than 20 years leadership in building rugged, reliable heat guns. It is engineered to deliver the temperatures and air volume required for the most demanding jobs in factories, laboratories and workshops. Every component is designed to meet the exacting demands of heavy duty industrial use. Check the quality features below, and see for yourself why the Master Heat Gun is the overwhelming industry choice in portable, flameless heat tools.

|---|--|---|---|
| 1. Double-jacketed heater housing protects heating element from damage.                                   | 4. Adjustable air intake controls air volume and temperature range.                                    | 7. Three-position "off-on-hot" finger-tip rocker switch is easy to use.   | 9. Comfortable contoured handle combined with overall balance of unit gives operator secure grip and firm control of gun. |
| 2. Reinforced, mica-insulated ceramic heating element withstands hard use.                                | 5. Powerful high speed universal motor. Production-line quality for high volume heat, hour after hour. | 8. Non-slip rubber-backed base permits full 90° rotation of heat gun for use in any position on workbench or assembly line. | 10. Heavy duty, all resistant neoprene 3-wire cordset features a molded-on grounded 3-prong plug                          |
| 3. Sturdy die-cast aluminum housing is rugged and light weight. Protects motor assembly from hard knocks. | 6. Externally accessible brush holders permit changing brushes without disassembly of unit.            |   |   |
