

PLUG TO HOSE COMBINATION FITTINGS

Eliminates multiple fittings and assembly. Put a Combination Hose Insert on one end of a hose, and a Coupler on the other. Hoses may then be snapped together in series.

- All flow diameters maximized to reduce restrictions.
- For use with Push-Lok or standard hose.

THREAD CHECK THREAD GAUGE

THREE FUNCTIONS: ¹CHECKS THREAD SIZES, ²PITCH SIZES, ³LENGTHS OF THREADS

It's a GO/NO GO Gauge for National Pipe Threads.

Checks five common pipe sizes

Here is how it works:

Thread Check is an easy way to check pipe threads. This handy tool can check pipe thread sizes from 1/16" thru 1/2" N.P.T.. The NPT4 gauge is a precision measuring tool made of heavy aluminum and is used to simply identify pipe thread sizes. It verifies proper pitch diameter and length of thread. Simply turn pipe thread into the correct size hole until snug. If the thread is to specifications it should reach flush to the back of the gauge. If the thread sticks out the back of the gauge, then the thread is undersized.

Part No. NPT4 \$11.75 ea.
