

MANIFOLD COMBINATIONS

PREASSEMBLED AND READY FOR PRODUCTION

The PPE VF Series VisionFlow Manifold come in three (3) types to suit your needs and are ready to give you the total control over your mold fluid circulation with no extras to buy. The flow meters are reversible so you can measure flow TO or FROM your mold by simply unscrewing them and installing them facing the opposite direction. Units are assembled with reusable O-ring seals on all mating faces instead of messy pipe dope to make reversal clean and easy.
