

WD-40

ALL-PURPOSE SPRAY

PENETRATES-PROTECTS-CLEANS-LUBRICATES-DISPLACES MOISTURE

Penetrates

WD-40's *ultra high surface attraction* results in a "SUPER" penetrating action which loosens rust-to metal bonds and "frees" stuck, frozen or rusted metal parts, bolts, connectors, operating controls and linkages . . . the broad spectrum action of WD-40 keeps them working freely!

Protects

WD-40's *ultra high surface attraction* properties deposit corrosion resistant ingredients over the entire surface area including microscopic irregularities. The protective barrier provides positive rust and corrosion protection against moisture and other corrosive elements. Additionally, the moisture displacement activity of WD-40 precludes the possibility of a tiny "pocket" of moisture from causing future problems.

Cleans

WD-40's *ultra high surface attraction* characteristic comes into play to drive WD-40 under dirt, grime, "caked" grease and oil to clean the surface at the same time it is forming a corrosion resistant barrier.

Lubricates

WD-40's *ultra high surface attraction* assures that the excellent lubricating ingredients in WD-40 will be widely spread and tenaciously held to all rubbing surfaces. WD-40 is silicone free, clean to use and leaves no messy, gummy residue normally associated with old fashioned oils.

Surface Attraction

WD-40 is formulated for *ultra high surface attraction* to metal. This unique property is the key to WD-40's ability to outperform so many single purpose products. It completely "wets" surfaces including microscopic irregularities, even in the presence of moisture. This property of being "Wetter than Water" accounts for WD-40's remarkable ability to deliver and spread the active ingredients onto hard-to-reach areas.

COMPARE PRICES!

One spray of WD-40 provides many separate yet interdependent functions—each reinforcing the other to achieve superior total "Broad Spectrum" results.

SMART STRAW

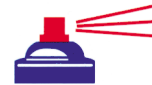

SMART STRAW.
Never lose the straw again; it's permanently attached!

BIG BLAST Can
covers everything faster!

BIG BLAST Can
Spray rate:
4.65g/second @ 105 psig.
Pattern:
5" @ 8" distance

Normal Can
Spray rate:
1.3g/second @ 105 psig.
Pattern:
2" @ 6" distance

BIG BLAST

Displace Moisture

Because of WD-40's *ultra high surface attraction*, it is able to drive under surface moisture and establishes a protective barrier between the moisture and parent metal. WD-40 is a nonconductor of electricity and quickly eliminates moisture induced short circuits in electrical and electronic equipment.

PLASTICS: The following plastics were immersed in WD-40 for 168 hours with no visible effects:

- Polyethylene
- Formica
- Epoxy
- Delrin
- Polyester
- Polypropylene
- Acrylic
- Vinyl
- PTFE
- Nylon

Clear polycarbonate and polystyrene may stress craze or crack in contact with WD-40.

Rubber: No visible effects on surfaces of various types of rubber sprayed with WD-40. Certain types of rubber will swell upon prolonged immersion in WD-40.

PART NO.	DESCRIPTION	PRICE EACH
WD-40-3	3 OZ. AEROSOL CAN (12/BOX)	\$2.50
WD-40-8S	8 OZ. SMART STRAW AEROSOL CAN (24/BOX)	4.40
WD-40-11S	11 OZ. SMART STRAW AEROSOL CAN (12/BOX)	5.65
WD-40-12S	12 OZ. SMART STRAW AEROSOL CAN (12/BOX)	5.85
WD-40-16	16 OZ. INDUSTRIAL SIZE AEROSOL CAN (12/BOX)	5.75
WD-40-BB	18 OZ. BIG BLAST AEROSOL CAN (12/BOX)	6.45
WD-40-1G	1 GALLON CONTAINER (4/BOX)	20.65
WD-40-5G	5 GALLON CONTAINER	99.60
* WD-40-55G	55 GALLON DRUM	*995.00
WD-40-SB	SPRAY BOTTLE (EMPTY APPROX. 20 FL. OZ.)	3.15

* Price includes freight within continental U.S. Allow 7 to 10 days for delivery. Shipped factory direct.
