

FOOD GRADE MOLD GREASE with PTFE

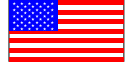

FOR GEARS, CAMS, CABLES, PINS, SLIDES, BEARINGS, CHAINS, ETC., ETC.

PPE Food Grade PTFE Mold Grease is a non-silicone, synthetic lubricating grease, specifically developed for use around the mold where food approval is needed. It is both NSF/USDA H-1 rated and Kosher approved. A wide temperature range of -75°F to 500°F allows it to be used in a wide variety of applications. It is non-melting, anti-corrosive, non-staining and can withstand high loads due to its superior load bearing ability. It does not contain clay fillers.

WHITE LITHIUM GREASE

FOR GEARS, CAMS, CABLES, PINS, SLIDES, BEARINGS, CHAINS, ETC., ETC.

PPE White Lithium Grease is a white lithium based lubricating grease especially formulated for lubrication of a large variety of equipment over a wide range of operating conditions. It provides excellent lubrication in both high and low temperature conditions, has a dropping point of 360°F and exhibits very good water washout characteristics. It performs well under heavy loads and provides excellent lubrication protection under severe conditions, as it retains its worked stability. White lithium grease does not thin out significantly in service and has USDA H-2 rating.
