FORMULA:

PPE STEP ONE ACID NEUTRALIZER AND MOISTURE DEHYDRATION N-812 is part of a two-step mold conditioning process specifically formulated to fully protect highly polished molds and dies. It removes finger prints, stains, spots, perspiration acids and displaces moisture or condensation, plus cleans and prepares the surface for application of Rust Preventive Step Two R-912. Use Step Two R-912 Rust Preventive immediately after cleaning with Step One because Step Two flushes away moisture and impurities picked-up in Step One and leaves your mold surface fully protected.
