

OETIKER CLAMPS WITH INSERTS

FOR SMALL DIAMETER APPLICATIONS AND A 360° SEAL

ZINC
PLATED

ISO 9001

MANUFACTURED IN A
QUALITY SYSTEM CERTIFIED
FACILITY.

Oetiker 1-Ear Special Clamps are also available with an insert fitted inside the clamp. These are known as the Oetiker GER Clamps. This insert prevents the hose from being pinched or from being squeezed into the gap at the ear. We normally recommend the Oetiker Stepless® Clamps for critical applications where a 360° seal is of utmost importance. However, there are some applications for which the GER Clamp may be the better choice. These include small diameter applications needing a strong grip (the clamp has reinforcing double dimple combination), or when an application requires a smooth outer surface.

MATERIAL: STAINLESS STEEL
Clamp = 304 Stainless
Insert = 301 Stainless

**A MUST FOR
SOFT SILICONE
HOSES!**
