

ADJUSTABLE DEPTH THERMOCOUPLES

FITS ALL T.C. HOLES 1/2" TO 10" DEEP - TYPE J & TYPE K

TYPE J = IRON/CONSTANTAN TYPE K = CHROMEL/ALUMEL

PPE Adjustable Depth thermocouples are designed to fit T.C. holes from 1/2" to 10" deep. They permit you to standardize on one model thermocouple for most of your requirements. They have a threaded locking cap which when rotated traverses up or down the special tension spring to obtain the desired immersion length.

Ungrounded Thermocouples are used on newer Van Dorn and some other makes of molding machines. They are used to isolate the T.C. from other sources of voltage that could affect your temperature readings.
