- **INSTALLS QUICKLY**
- **NO RETIGHTENING**
- **NO CLAMP CREEPING**
- **SAVES SPACE**

Compare an Oetiker Clamp to any other clamp for prices and quality. Oetiker has the ear with a "dimple". This simple design difference not only adds increased strength to the grip of the clamp, it also creates a spring-like action which permits the clamp to "breathe" without loosening. We also believe that the mechanical lock of the Oetiker Clamp is superior to any other joint. Spotwelding techniques are not used and therefore the possibility of failure due to corrosion at the spot weld is eliminated.

This clamp style can also be formed into an oval shape.

TECHNICAL INFORMATION

MATERIALS:

Zinc plated clamps are made of 1008/1010 carbon steel, hot dipped and galvanized to designation G 90 (ASTM A 525). It will withstand a salt spray test of 72 hours.

PRESSURE:

As a guideline, Oetiker 1-Ear Clamps have held 30 bar - 441 psi. This was done using a static water pressure test. 2-Ear Clamps 54 bar - 800 psi with 35 pulsating strokes per min.

IN STOCK

CUSTOMER CAUTION:

An inferior imitation of the high quality Oetiker Clamp is being sold by a competitor. Oetiker and PPE suggest you buy the best, buy from PPE
