

MOLD SAVER METAL PROTECTOR ANTI-RUST COATING #MSP-16

**ABSOLUTELY
THE BEST!**

**SHIELDS
YOUR MOLDS
BUT WON'T
PENETRATE
INTO PINS
AND SLIDES!**

**A DRY
WAXY
CIC**

**A CLEAR
SOFT
PROTECTIVE
COATING**

**LONG OR
SHORT TERM
STORAGE**

SPECIFICATIONS:

- 16 oz. volume, 12 oz. fill weight
- Higher concentration of antirust coating
- Colorless-soft-dry-waxy
- Plastic spray valve
- Shelf life 1 year

FORMULA:

PPE MOLD SAVER MSP-16 is a perfect corrosion inhibiting compound (CIC) antirust protective coating for highly polished molds to be stored for long or short periods of time. It forms a colorless, soft, dry, waxy film that protects until removed. It won't penetrate into your pins and slides which can burn and stain your parts after mold start-up. It protects highly polished mold cavities and other metal surfaces from moisture, oxidation, rust and corrosion. It is effective in salt spray, high humidity, rapid mold temperature changes, indoor and outdoor storage. One can covers about 104 sq. ft. of area. For long term storage apply several thin coatings to obtain a heavier film. Allow each coat to dry between applications.

SPECIFICATIONS:

- 16 oz. volume, 11 oz. fill weight.
- A heavy coat CIC rust preventive.
- Amber color, easy to identify.
- Wide fan spray for better coverage.
- Shelf life 1 year minimum.

FORMULA:

PPE MOLD SAVER 2 MSL-216 leaves a heavy coating of amber color rust preventive formulated to properly protect molds from rusting. It's ideal for long term storage, indoor or outdoors when properly applied. Due to it's excellent sealing properties you must properly and thoroughly prepare the metal surfaces to be coated. Remove all moisture, finger print acids, greases, etc.. We suggest using PPE step one acid neutralizer and moisture dehydrating spray N-812. For long term storage add several coats of MSL-216 allowing each coat to dry.
