

MOISTURE RESISTANT MODELS

ADJUSTABLE DEPTH THERMOCOUPLES

FITS ALL T.C. HOLES 1/2" TO 10" DEEP - TYPE J

TYPE J = IRON/CONSTANTAN

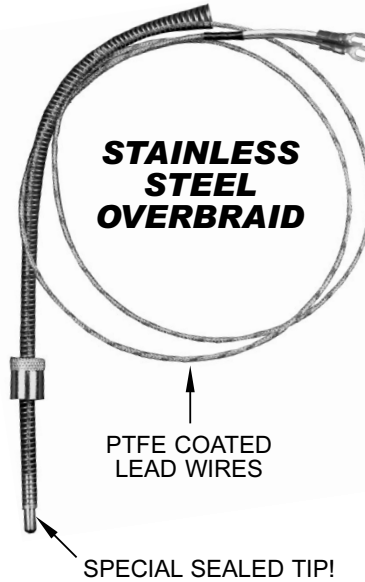

— MOISTURE RESISTANT MODELS —

NOTE: For high humidity or mild moisture situations we suggest you avoid using standard Type J Thermocouples that contain an iron wire. We recommend you set-up with Type K if possible or change to our Type J Moisture Resistant Thermocouples with a special sealed tip and PTFE coated lead wires. Good to 550°F.

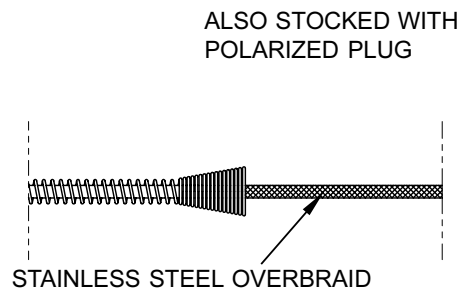

PPE Adjustable Depth thermocouples are designed to fit T.C. holes from 1/2" to 10" deep. They permit you to standardize on one model thermocouple for most of your requirements. They have a threaded locking cap which when rotated traverses up or down the special tension spring to obtain the desired immersion length.

Ungrounded Thermocouples are used on newer Van Dorn and some other makes of molding machines. They are used to isolate the T.C. from other sources of voltage that could affect your temperature readings.

- FEATURES -

- MOISTURE RESISTANT MODELS GOOD TO 550°F.
- STAINLESS STEEL BRAIDED LEADS.
- FITS HOLE DEPTHS 1/2" TO 10".
- REDUCES YOUR INVENTORY OF VARIOUS TIP LENGTHS.
- STOCKED W/SPADE LUGS OR POLARIZED PLUG.
- FLEXIBLE PROBE BENDS TO ANY ANGLE.
- FITS STANDARD BAYONET ADAPTORS.
- GROUNDED OR UNGROUNDED.
