PTFE DRY POWDER SPRAY
PAINTABLE MOLD RELEASE #T-123

A FULL 12 OUNCE FILL COMPARE!
NO CHEAP SOLVENTS

NON-SILICONE

IDEAL FOR APPLICATIONS THAT REQUIRE A PTFE DRY POWDER SPRAY.

SPECIFICATIONS:
- 16 oz. vol, 12 oz. fill wt.
- Handy can size
- Paintable
- Higher concentration
- High quality propellants
- PTFE temp. range - 400°F. to +550°F.

FORMULA:
PPE Dry Powder Spray T-123 contains pure PTFE polytetrafluoroethylene dry powder blended with a bonding agent for adhesion to the mold surface and the correct solvents and propellants necessary to formulate a high quality mold release. It has the lowest coefficient of friction of any solid material known and is one of the most inert substances known which makes it an ideal mold release parting agent for use with most plastics, elastomers and resins including acrylics, urethanes, rubber, nylons, epoxy, polycarbonates, and polystyrene.

KRYFILM® DRY WAXY SPRAY
PAINTABLE MOLD RELEASE #V-116

A FULL 12 OUNCE FILL, COMPARE! (not 10 oz.)

NON-SILICONE

LEAVES A DRY FILM RELEASE AGENT OF PFPE

DRY WAXY PAINTABLE SPRAY

SPECIFICATIONS:
- 16 oz. vol, 12 oz. fill wt.
- Handy can size
- Paintable
- Standard concentration
- Plastic spray valve
- KRYFILM® is heat stable to 650°F (PFPE).
- Shelf life 1 year min.

FORMULA:
PPE KRYFILM® Dry Waxy Spray V-116 contains a pure DuPont PFPE product which is a dry, waxy short chain telomer of polytetrafluoroethylene blended with the correct solvents and propellants to formulate a dry film paintable anti-stick release agent ideal for a wide variety of applications. Not to be confused with PTFE! It is excellent for plastic injection molding where optic clarity is important and can be used safely on polystyrene, polypropylene, acrylics, nylon, epoxy, phenolics, rubber and plaster. Other applications include leather, gaskets, drive belts, o-rings, bearings, chain drives, saw blades, textile machinery, vending machines, instrument bearings and office machines.
