

RUST PREVENTIVE MOLD CLEANER OVERNIGHT

WITH ACID NEUTRALIZER #RP-1275

A FULL 12 OZ FILL COMPARE!

THE BEST SHORT TERM OVERNIGHT AND WEEKEND PROTECTION

snorkel tube included

THE ONE-STEP PROCESS THAT GIVES YOU FULL PROTECTION IT'S LIKE TWO SPRAYS IN ONE!

SPECIFICATIONS:

- 16 oz. volume, 12 oz. fill weight
- Does not contain CFC's or silicone
- Film clear
- Shelf life minimum 1 year
- Salt spray test 5% @ 95°F. 120 hrs. minimum protection
- Snorkel tube included

NON-CHLORINATED

FORMULA:

The special formula in **PPE Rust Preventive Spray RP-1275** contains a combination of ingredients to displace moisture and prevent rust. It removes corrosion forming substances such as lactic acid, urea and sodium chloride which are found in fingerprint acids. It cleans and degreases your surfaces to be protected and under normal use it is nontoxic and nonstaining. Its clear clean formula makes it ideal for weekend shutdowns. The low density of active ingredients to prevent rust permits us to fill 16 oz. by volume (12 oz. net weight) which provides you with more applications of a lightweight clear rust preventive protector necessary for use on highly polished molds. Our special formula eliminates the need or use of more costly two step processes. It can be removed easily with your first few shots or with any petroleum solvent. Each can contains over 75% rust preventive and less than 25% propellant. It provides up to 20 days rust protection at temperatures to 120°F and high humidity. For high moisture conditions or longer protection use PPE MSP-16 Mold Saver Protector.

ISO-9001
MANUFACTURED IN A QUALITY SYSTEM CERTIFIED FACILITY.

SPRAY NO. RP-1275

QUANTITY	PRICES	
	PER DOZ.	PER CAN
1-5 DOZ.	\$52.80	\$4.40

BULK RUST PREVENTIVE

WITH ACID NEUTRALIZER #BRP1675

ISO-9001

MANUFACTURED IN A QUALITY SYSTEM CERTIFIED FACILITY.

THE BEST MOISTURE DISPLACING RUST PREVENTIVE AVAILABLE!

– IDEAL FOR CHILLED MOLDS –

FOR PROTECTING MOLDS, DIES, NOZZLES, SCREW TIPS, SPRUE BUSHINGS, GRINDER BLADES, TOOLS, MOLD CLAMPS, BOLTS, SHAFTS, THREADS, ETC., ETC.

The new formula in **PPE Rust Preventive BRP-1675** differs from our Aerosol RP-1275 in that it leaves a heavier clear protective coating. It has the highest flash point of all moisture displacing rust preventatives (275°F), which makes it the ideal product for use on and around hot molds. We highly recommend this product for chilled molds where condensation is a problem. BRP-1675 lifts moisture from your surfaces to be protected and leaves a clear oily film which lasts for months. It is easily removed with any petroleum solvent. It is a mineral oil base material safe for use on all applications requiring a rust preventive.

APPLY LIBERALLY BY WIPING, BRUSHING OR HAND SPRAYING.

– PRICES –

PER GALLON (CAN) BRP1675-01 \$37.00
PER 5 GALLON (CAN) BRP1675-05 155.00
PER 55 GALLON (DRUM) BRP1675-55 1,495.00

Undiluted, can be cut with any solvent if desired.
