

AC VOLTAGE SENSORS

Prevent Electrical Shock! Trace Electrical Circuits!

The AC Voltage Sensors are patented, UL listed instruments that are manufactured 100% in the USA. These instruments are non-contact AC voltage sensors that can be used to detect the presence or absence of AC voltage in order to prevent electrical shock. No skill is required for using this instrument. The user simply places the sensor on the test area that may contain voltage. If AC voltage is present, the LED light in the tip will glow cherry red. This instrument senses the presence of AC voltage through insulation, so no connection with the metal conductor wire is required. The AC Voltage Sensors are a must for all electrical and maintenance personnel!

The AC Voltage Sensor May Save A Life!

Every year at least 30,000 individuals experience accidental shock. Over 1000 of these accidents are fatalities.

The AC Voltage Sensor is the choice of OSHA

OSHA's Electrical Technical Equipment Committee has selected the "AC Voltage Sensor 3115" as the only product of its type that can be utilized by OSHA compliance officers to identify and cite electrical hazards of 50 volts or more.

Features:

- UL LISTED - Tested for public safety.
- CAT III & CAT IV rated.
- Outstanding safety instrument - Locates defective ground, energized circuits, induced voltage.
- No contact with conductor wire required.
- Senses voltage through insulation.
- All outer surfaces are non-conductive for safety.
- Fits in shirt pocket for convenience.
- Excellent circuit tracer.
- Electrician, maintenance, service and safety personnel need this tool daily.
- Probe glows cherry red in presence of A.C. voltage - no skill required for operation.
- 3115 & 3000 detect 50-1000 Volts A.C.
- 3215 detect 24-90 Volts A.C.
- Lifetime Warranty.
- 2 "AAA" 1.5 volt alkaline batteries included.
- Manufactured and packaged in the USA.
- Always ready to use, no switch required.

AC VOLTAGE SENSOR

Part No. 3115 \$13.20 ea.

ULTIMATE AC VOLTAGE SENSOR WITH AUDIO ALERT

The Ultimate AC Voltage Sensor operates very much like the 3115. It has a new feature, an audio alert! You not only get a visual alert, but an audio alert as well. Another important feature of the Ultimate AC is that the audio alert reacts only to an AC voltage field, and will not beep when it comes in contact with a static field.

Part No. 3000 \$14.50 ea.

LOW AC VOLTAGE LOCATOR

The Low AC Voltage Locator is similar to the 3115. However, it is a high-tech device for determining the presence or absence of 24-90 volts AC in an electrical or electronic system. The Low AC Voltage Locator may be checked by rubbing the probe tip on an article of clothing. This creates a static charge which causes the LED in tip to flicker indicating proper instrument function.

Part No. 3215 \$16.20 ea.
