FOR LONGER FLEXIBLE LEADS DO-IT-YOURSELF AND \$AVE

MAKE YOUR OWN LEAD WIRE EXTENSIONS TO ANY LENGTH FOR LESS THAN THE FACTORY COST.

1. Select wire size to suit your amperage requirements. Normally size 18 TGGT 600 volt wire is used on nozzle bands. It can carry a load of 2760 watts on 120 volt or 5520 on 240 volt.

2. Select an insulated butt connector to suit. Normally a B-4067-N is used on 18 wire. Stagger your butt connectors, make your crimp and you have the exact length to suit your requirements. No wasted length to cut off and no waiting delivery.
