

POWER TEMP - SERIES II SOLID STATE AC POWER CONTROLLERS

The Power Temp II is an advanced solid state AC power controller that can control loads up to 15 Amps. The digital interface allows for more accurate power control. Users can adjust the percentage power output in 1% increments which is displayed on the easy to read digital LED. Amperage can also be displayed and used as a reference for more custom control. The controller has 4 advanced output modes including: phase output control, full cycle, half cycle, and a fast calculation burst mode to allow for adaptation to many situations and hardware. Safety features include ABC-15 input fuse, GBB-15 output fuse, relay cutoff, as well as software defined current monitoring. Maximum current limit is adjustable for users' specific needs.

- Compact size (4.25"L x 5.75"W x 2.75"H)
- Light weight - only 1.8 lbs.
- Uses standard outlet receptacles
- Economical replacement for variable transformers
- Solid state circuitry
- 15 amp capacity
- 6' power cord
- Controls motors, heaters, lights, etc.
- Easy to read LED Display
- Adjustable max current limit
