# COPPER RT NOZZLE TIPS

BERYLLIUM COPPER - 1/2" & 3/4" RADIUS

PPE Beryllium Copper RT Nozzle Tips are made of BECU-25 Beryllium Copper and heat treated to 38 to 44 RC for maximum toughness. Beryllium Copper attains the highest strength of any copper based alloy. In solid form as a finished nozzle tip beryllium copper presents no known health hazards. However breathing in dust or vapors as formed when machining can eventually cause lung damage. Beware of cheaper inferior copper nickel tips because the raw material is one half the cost plus it's softer pre-heat treated material can only reach 20 RC. Copper Tips can transfer heat up to 7 times faster than steel. Always specify PPE Genuine High Quality Beryllium Copper Nozzle Tips!
