PPE Drool Blockers are high quality super hi-temperature fiber discs designed to block hot drooling plastics from oozing back onto your nozzle or barrel heater bands. Most nozzle heater band failures are caused by hot drooling plastics attacking your wiring or penetrating the heater sheath shorting them out. Our high quality hi-temp and low prices allow you to dispose contaminated discs economically. That's good for the budget!

**WITHSTANDS
2012°F!**

TYPICAL APPLICATION

The 6" Drool Blocker Disc with 3/4" hole (DS06075) shown used between the nozzle tip and the nozzle body .
