

COMPRESSION RINGS FOR CHECK RING VALVES & BALL CHECKS

STYLE 4

PPE COMPRESSION RINGS PRESERVE COMPRESSION & EXTENDS BARREL LIFE.

ISO-9002
MANUFACTURED IN A QUALITY SYSTEM CERTIFIED FACILITY.

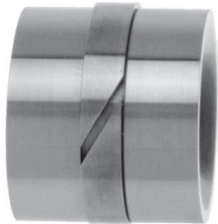

OPTION 2
Buy only the Sliding Ring with the Compression Ring installed.
(1 DAY DELIVERY!)

OPTION 1
Buy A Complete Check Ring Valve Assembly with the Compression Ring installed.

OPTION 3
Buy the Compression Ring for your Sliding Ring and you install it.

THREE WAYS TO BUY:

1. Buy a complete check ring valve assembly with a compression ring installed, or:
2. Buy a sliding ring only with a compression ring installed, or:
3. Install a compression ring on **your** sliding ring and regain lost compression.

- FEATURES -

- Fits most screw tip rings.
- Temporarily extends barrel life.
- Permits you to finish running a molding job.
- Extends use of a worn barrel.
- Stops blowback due to wear.
- Reduces color change times.
- Improves cycle times.
- Same principle as an engine piston ring.

- SPECIFICATIONS -

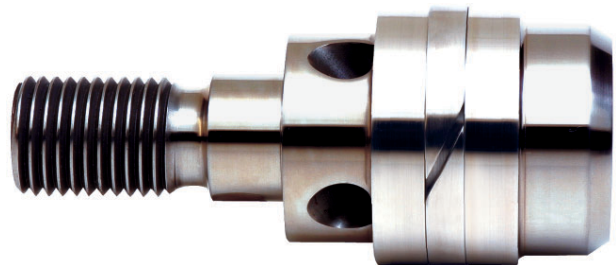

- For barrels worn up to .030 over original nominal inside diameter.
- Most standard sliding rings can be grooved to accept a PPE Compression Ring.
- Made of quality tool steel heat treated.
- Rings are expanded .040 over it's true diameter. A 2.000 inch ring measures 2.040 expanded.

- NO WARRANTY IMPLIED -

PPE cautions that a compression ring is only a quick, low cost, temporary fix for worn leaking barrels that won't hold compression. For example, on a nitralloy barrel nitrided, once your barrel is worn past the original nitrided surfaces of the original inside diameter, wear increases at an accelerated rate especially with a compression ring made of harder material pushing out against your barrel I.D. There is no substitute for a barrel, screw and check ring valve properly sized and engineered for any given application.

PPE does not completely approve of the use of a compression ring as a temporary fix for a worn barrel. However, since you, our customer, have requested them, we are making them available only as a quick temporary fix. However we have discovered some molders install these rings on new screws and barrels.

FOR BALL CHECKS TOO!
