1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY/UNDERTAKING

Material Name : Ethylene Glycol
Other names / Synonyms : Ethane diol 1,2
MEG
Glycol
Dihydroxy ethane 1,2
Ethylene Glycol
Recommended use / Restrictions of use : Chemical intermediate. Advice in this document relates only to product as originally supplied. Other derivative chemicals will have different properties and hazards. Advice should be sought on their safe handling and use.
Supplier : Shell Eastern Trading (PTE) Ltd
9 North Buona Vista Drive,
#07-01, Tower 1, The Metropolis
Singapore 138588
Singapore
Telephone : +65-6384 8000
Fax : 
Emergency Telephone Number : +44 (0) 151 350 4595

2. HAZARDS IDENTIFICATION

GHS Classification : Acute toxicity, Category 4
Specific target organ toxicity - repeated exposure, Category 2, Kidney.

GHS Label Elements
Symbol(s) :

Signal Words : Warning

GHS Hazard statements : PHYSICAL HAZARDS:
Not classified as a physical hazard under GHS criteria.
HEALTH HAZARDS:
H302: Harmful if swallowed.
H373: May cause damage to organs or organ systems through prolonged or repeated exposure. Kidney.
ENVIRONMENTAL HAZARDS:
Not classified as an environmental hazard under GHS criteria.
GHS Precautionary Statements

Prevention:
- P260: Do not breathe dust/fume/gas/mist/vapours/spray.
- P264: Wash hands thoroughly after handling.
- P270: Do not eat, drink or smoke when using this product.

Response:
- P301+P312: IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
- P330: Rinse mouth.
- P314: Get medical advice/attention if you feel unwell.

Storage:
- No precautionary phrases.

Disposal:
- P501: Dispose of contents and container to appropriate waste site or reclaimer in accordance with local and national regulations.

Other Hazards which do not result in classification:
- Not classified as flammable but will burn.
- Ingestion may cause drowsiness and dizziness.
- Inhalation of vapours or mists may cause irritation to the respiratory system.

Aggravated Medical Condition:
- Pre-existing medical conditions of the following organ(s) or organ system(s) may be aggravated by exposure to this material: Kidney.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical Identity:
- 1,2-Ethane diol.
Synonyms:
- Ethane diol 1,2
- MEG
- Glycol
- Dihydroxy ethane 1,2
- Ethylene Glycol

CAS No.: 107-21-1
INDEX No.: 603-027-00-1
EINECS No.: 203-473-3

4. FIRST-AID MEASURES

General Information:
- Not expected to be a health hazard when used under normal
The first aid measures for different exposure routes:

**Inhalation**: Remove to fresh air. If rapid recovery does not occur, transport to nearest medical facility for additional treatment.

**Skin Contact**: Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.

**Eye Contact**: Flush eye with copious quantities of water. If persistent irritation occurs, obtain medical attention.

**Ingestion**: DO NOT DELAY. Do not induce vomiting. If victim is alert, rinse mouth and drink 1/2 to 1 glass of water to help dilute the material. Do not give liquids to a drowsy, convulsing, or unconscious person. Transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration.

Notes to physician

**Most important symptoms and effects, both acute and delayed**

Kidney toxicity may be recognized by blood in the urine or increased or decreased urine flow. Other signs and symptoms can include nausea, vomiting, abdominal cramps, diarrhoea, lumbar pain shortly after ingestion, and possibly narcosis and death. Eye irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blurred vision. Skin irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blisters. Respiratory irritation signs and symptoms may include a temporary burning sensation of the nose and throat, coughing, and/or difficulty breathing.

**Immediate medical attention, special treatment**

IMMEDIATE TREATMENT IS EXTREMELY IMPORTANT! May cause significant renal, respiratory, and CNS toxicity. May cause significant acidosis. Call a doctor or poison control center for guidance.

5. FIRE-FIGHTING MEASURES

**Specific Hazards**

Material will not burn unless preheated. Carbon monoxide may be evolved if incomplete combustion occurs. Containers exposed to intense heat from fires should be cooled with large quantities of water.

**Suitable Extinguishing Media**

Alcohol-resistant foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.

**Unsuitable Extinguishing Media**

Do not use water in a jet.

**Protective Equipment for Firefighters**

Wear full protective clothing and self-contained breathing apparatus.

**Other Advice**

Evacuate the area of all non-essential personnel. Keep adjacent containers cool by spraying with water.

6. ACCIDENTAL RELEASE MEASURES

**Personal Precautions, Protective Equipment and Emergency Procedures**

Avoid contact with spilled or released material. For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet.
Environmental Precautions: Prevent from spreading or entering into drains, ditches or rivers by using sand, earth, or other appropriate barriers. Use appropriate containment to avoid environmental contamination. Ventilate contaminated area thoroughly.

Methods and Material for Containment and Cleaning Up: Contain run-off from residue flush and dispose of properly. Soak up residue with an absorbent such as clay, sand or other suitable material. For small liquid spills (< 1 drum), transfer by mechanical means to a labelled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely. For large liquid spills (> 1 drum), transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

Additional Advice: See Chapter 13 for information on disposal. Observe all relevant local regulations. Notify authorities if any exposure to the general public or the environment occurs or is likely to occur. Dike and contain spill water.

7. HANDLING AND STORAGE

General Precautions: Avoid breathing vapours or contact with material. Only use in well ventilated areas. Wash thoroughly after handling. On guidance on selection of personal protective equipment see Chapter 8 of this Safety Data Sheet. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.

Precautions for Safe Handling: Use local exhaust extraction over processing area. Handle and open container with care in a well-ventilated area. Do not empty into drains. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Handling Temperature: Ambient. 60 °C maximum

Conditions for Safe Storage: Tanks must be clean, dry and rust-free. Keep container tightly closed. Must be stored in a diked (bunded) well-ventilated area, away from sunlight, ignition sources and other sources of heat. Cleaning, inspection and maintenance of storage tanks is a specialist operation which requires the implementation of strict procedures and precautions. Drums should be stacked to a maximum of 3 high. Storage Temperature: Ambient. 60 °C maximum

Product Transfer: Keep containers closed when not in use. Do not pressurize drum containers to empty.

Recommended Materials: Stainless steel. Mild steel. Carbon steel

Other Advice: Ensure that all local regulations regarding handling and storage
8. EXPOSURE CONTROLS/PERSONAL PROTECTION

If the American Conference of Governmental Industrial Hygienists (ACGIH) value is provided on this document, it is provided for information only.

**Occupational Exposure Limits**

<table>

<td>127 mg/m³</td>
<td></td>
</tr>
</tbody>
</table>

**Additional Information:** Wash hands before eating, drinking, smoking and using the toilet. Launder contaminated clothing before re-use.

**Biological Exposure Index (BEI)**

No biological limit allocated.

**Appropriate Engineering Controls:** No exposure controls are ordinarily required under normal conditions of use. It is good general industrial hygiene practice to minimize exposure to the material.

**Individual Protection Measures**

- **Respiratory Protection:** If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where air-filtering respirators are unsuitable (e.g., airborne concentrations are high, risk of oxygen deficiency, confined space) use appropriate positive pressure breathing apparatus. Where air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and vapors [Type A/Type P boiling point > 65°C (149°F)] meeting EN14387 and EN143.

- **Hand Protection:** Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739, AS/NZS:2161) made from the following materials may provide suitable chemical protection: Longer term protection: PVC. Neoprene rubber. Nitrile rubber. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.

**Eye Protection**

- Chemical splash goggles (chemical monogoggles).

**Body protection**

Skin protection not ordinarily required beyond standard issue.
work clothes. Chemical resistant gloves/gauntlets, boots, and apron.

Thermal hazards:
- Not applicable

Monitoring Methods:

Environmental Exposure Controls:
- The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate ventilation to control airborne concentrations. Exhaust emission systems should be designed in accordance with local conditions; the air should always be moved away from the source of vapour generation and the person working at this point. Eye washes and showers for emergency use. Firewater monitors and deluge systems are recommended.

### Solubility in other solvents
- Data not available.

### n-octanol/water partition coefficient (log Pow)
- -1.93 at 20 °C / 68 °F

### Decomposition temperature
- Note: Stable under normal conditions of use., Reacts with strong oxidising agents.

### Dynamic viscosity
- Data not available.

### Kinematic viscosity
- 33 mm²/s at 20 °C / 68 °F

### Vapour density (air=1)
- 2.14

### Electrical conductivity
- Electrical conductivity: > 10 000 pS/m, A number of factors, for example liquid temperature, presence of contaminants, and anti-static additives can greatly influence the conductivity of a liquid., This material is not expected to be a static accumulator.

### Stability
- Stable.

### Evaporation rate (nBuAc=1)
- > 0.01

### Molecular weight
- 62.07 g/mol

### Hygroscopicity
- Hygroscopic.

### 10. STABILITY AND REACTIVITY

#### Chemical stability
- Stable under normal conditions of use. Reacts with strong oxidising agents.

#### Conditions to Avoid
- High Temperature.

#### Incompatible Materials

#### Hazardous
- Thermal decomposition is highly dependent on conditions. A complex mixture of airborne solids, liquids and gases, including carbon monoxide, carbon dioxide and other organic compounds will be evolved when this material undergoes combustion or thermal or oxidative degradation.

#### Possibility of Hazardous Reactions
- Data not available.

#### Sensitivity to Static Discharge
- No, product cannot ignite due to static electricity.

### 11. TOXICOLOGICAL INFORMATION

#### Information on Toxicological effects
- Information given is based on product testing.

#### Likely Routes of Exposure
- Skin and eye contact are the primary routes of exposure although exposure may occur through inhalation or following accidental ingestion.

#### Acute Toxicity
- **Acute Oral Toxicity**: Harmful if swallowed. LD50 >300 - <=2000 mg/kg
  - There is a marked difference in acute oral toxicity between rodents and man, man being more susceptible than rodents. The estimated fatal dose for man is 100 millilitres (1/2 cup). This material has also been shown to be toxic and potentially lethal by ingestion to cats and dogs.

- **Acute Dermal Toxicity**: Expected to be of low toxicity: LD50 >5000 mg/kg

- **Acute Inhalation**: Low toxicity by inhalation.
Toxicity
Skin Corrosion/Irritation: Slightly irritating to skin.
Serious Eye Damage/Irritation: Slightly irritating to the eye.
Respiratory Irritation: Repeated inhalation of vapours and mists is expected to cause irritation of the respiratory tract.
Respiratory or skin sensitisation: Not expected to be a sensitiser.
Aspiration hazard: Not considered an aspiration hazard.
Germ Cell Mutagenicity: No evidence of mutagenic activity.
Carcinogenicity: Not carcinogenic in animal studies.
Reproductive and Developmental Toxicity: Does not impair fertility. Not a developmental toxicant. Causes foetotoxicity in animals; considered to be secondary to maternal toxicity.
Specific target organ toxicity - single exposure: Ingestion may cause drowsiness and dizziness. Inhalation of vapours or mists may cause irritation to the respiratory system.
Specific target organ toxicity - repeated exposure: May cause damage to organs or organ systems through prolonged or repeated exposure. Kidney: can cause kidney damage.

12. ECOLOGICAL INFORMATION

Basis for Assessment
Ecotoxicity:
Acute Toxicity
Fish: Practically non toxic: LC/EC/IC50 > 100 mg/l
Aquatic crustacea: Practically non toxic: LC/EC/IC50 > 100 mg/l
Algae/aquatic plants: Practically non toxic: LC/EC/IC50 > 100 mg/l
Microorganisms: Practically non toxic: LC/EC/IC50 > 100 mg/l
Chronic Toxicity
Fish: NOEC/NOEL > 100 mg/l
Aquatic crustacea: NOEC/NOEL > 100 mg/l
Mobility: If product enters soil, one or more constituents will be mobile and may contaminate groundwater. Dissolves in water.
Persistence/degradability: Readily biodegradable.
Bioaccumulative Potential: Does not have the potential to bioaccumulate significantly.

13. DISPOSAL CONSIDERATIONS

Material Disposal: Recover or recycle if possible. Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand. Remove all packaging for recovery.
or waste disposal. Do not dispose into the environment, in drains or in water courses. Waste product should not be allowed to contaminate soil or water.

Container Disposal: Dispose in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.

Local Legislation: Disposal should be in accordance with applicable regional, national, and local laws and regulations.

14. TRANSPORT INFORMATION

Land (as per ADR classification): Not regulated
This material is not classified as dangerous under ADR regulations.

IMDG
This material is not classified as dangerous under IMDG regulations.

IATA (Country variations may apply)
This material is either not classified as dangerous under IATA regulations or needs to follow country specific requirements.

Additional Information: This product may be transported under nitrogen blanketing. Nitrogen is an odourless and invisible gas. Exposure to nitrogen may cause asphyxiation or death. Personnel must observe strict safety precautions when involved with a confined space entry.

15. REGULATORY INFORMATION

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Local Regulations
Workplace Safety and Health Act & Workplace Safety and Health (General Provision) Regulations: This product is subject to the SDS, Labelling, PEL and other requirements in the Act/ Regulations.
Environmental Protection and Management Act and: This product is not subject to control under this Act/ Regulation.
Safety Data Sheet

Environmental Protection and Management (Hazardous Substances) Regulations
Maritime and Port Authority of Singapore (Dangerous Goods, Petroleum and Explosives) Regulations
Fire Safety Act and Fire Safety (Petroleum & Flammable Materials) Regulations

: This product is not subject to control under this Act/Regulation.

16. OTHER INFORMATION

GHS Hazard statements

H302 Harmful if swallowed.
H373 May cause damage to organs or organ systems through prolonged or repeated exposure.

SDS Version Number : 2.0
SDS Effective Date : 25.03.2014
SDS Revisions : A vertical bar (|) in the left margin indicates an amendment from the previous version.
Uses and Restrictions : Do not use in the manufacture or preparation of foods or pharmaceuticals.
Keep out of reach of children and pets.
Do not use in theatrical fogs or other artificial smoke generator applications.

SDS Distribution : The information in this document should be made available to all who may handle the product
Disclaimer : This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should not therefore be construed as guaranteeing any specific property of the product.
