ELECTRONIC EARMUFFS

ELIMINATE DANGEROUS NOISE LEVELS IN AN INSTANT

FEATURES:

- LED power indicator.
- On/Off switch with volume control.
- Solid-state circuit.
- Built-in 360° microphone amplifies low level sounds.
- More compact.
- Attenuates noise over 80db.
- Lightweight and comfortable with soft ear cushions and softer headband.
- Powered by 2 AA batteries (not included).

These Electronic Earmuffs give superb hearing protection that allow you to carry on a conversation or hear warning calls. In the "on" position, solid-state circuitry allows for normal hearing, yet all noise above 80db are automatically attenuated. In the "off" position, the Electronic Earmuffs provide hearing protection at all noise levels. These earmuffs are great for people who are exposed to intermittent dangerous noise levels.

HOW THEY WORK:

Turn on the on/off switch and adjust the volume knob until you hear sounds at normal volume (Note: If you increase the volume, the sound will be amplified). The LED will indicate that the circuit is on. There is one speaker in each ear pad, and only one control circuit and one microphone. When any sound increases over 80db, the circuit recognizes the noise and automatically attenuates it to appropriate level before noises reach ears. When the sound level is below 85db, the unit will restore normal hearing. 2 AA batteries provide approximately 200 hours of use.

IMPROVED QUALITY!
BETTER NOISE REDUCTION!
BETTER PRICE!

JAZZ BAND® HEARING PROTECTION

COOLER & LIGHTER ALTERNATIVE TO EARMUFFS

FEATURES & BENEFITS

- NRR 25dB
- 100% PVC Free
- Ideal choice for intermittent use
- Does not interfere with eyewear
- Includes 1 pair of replacement pods

Be sure to roll or compress pods before placing in your ear canal.

6506 BY MOLDEX

The Jazz Band® is a comfortable alternative to earmuffs, newly redesigned, it now has a higher NRR of 25dB with 50% less band pressure, which results in greater user compliance.
