

GRIP-N® GLOVES

USE FOR HANDLING PARTS OR AS A WORK GLOVE

ISO 9001

MANUFACTURED IN A
QUALITY SYSTEM CERTIFIED
FACILITY.

BOTH SIDES
COATED

**A GREAT GLOVE!
A GREAT VALUE!**

Handling injection molded parts or pipe on an oil rig, sheet metal cans on an assembly line or tools and materials in plant maintenance. USDA accepted "Grip-N" gloves deliver the best total value in industrial hand protection. That's because "Grip-N" gloves offer an equal ration of the four most desired features in the purchase of any glove...comfort, durability, grip and finger dexterity...and at a cost as low or lower than ordinary cotton gloves!

Features	Benefits
Unique PVC "N-Thread" Coating.	Non-skid grip. Outstanding abrasion resistance.
No seams	Superior finger dexterity. Will not chafe or tear. Comfortable in any climate.
Reversible <i>FOR TWICE THE LIFE!</i>	Can be worn on either hand. Longer life with four usable surfaces instead of two. No sorting before or after washing.
Easily laundered	Virtually no shrinkage (when washed in alkaline or other detergent solution).

VIBRATION DAMPENING GLOVES

USE WHEN: Sanding, Grinding, Polishing, etc.

BENEFITS:

- Meets anti-vibration standard ISO10819.19196 and ANSI S3/525.
- Black Nylon, 7 gauge shell for toughness.
- Machine washable.
- Rot resistant.
- Elastic wrist for snug fit.

**Full and Half-finger
7 Gauge Black Nylon Shell
Anti-Vibration Palm
and Fingers**

Vibration Dampening Gloves

These gloves are padded with a layer of vibration dampening polymer. Specially compounded, formed-chloroprene coated, seamless-lined gloves. Good for protection from repetitive impact and work with pneumatic vibrating tools. Ergonomic design offers both comfort and flexibility. Repetitive trauma associated with excessive vibration to the hands is a big problem in North America. Employees develop many symptoms associated with hand-arm vibration syndrome (HAVS). Hand-arm vibration is vibration transmitted into your hands and arms when you use hand-held powered work equipment. Too much exposure to hand-arm vibration can cause hand-arm vibration syndrome (HAVS) and carpal tunnel syndrome.

HAVS affects the nerves, blood vessels, muscles and joints of the hand, wrist and arm. It can become severely disabling if ignored.

PART NO.	DESCRIPTION	PRICE
