

# HOT TIP SPRUE CLEANER FOR CLEANING PLUGGED SPRUES

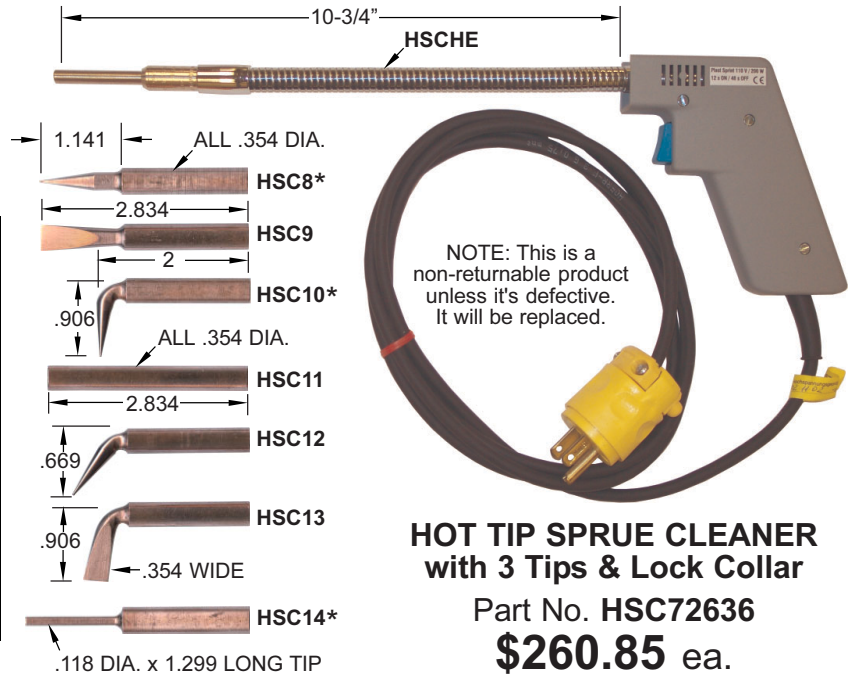

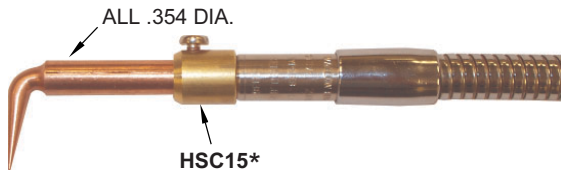

The Hot Tip Sprue Cleaner is a quick heating flexible tool for melting thermoplastics from plugged sprues. When you squeeze the trigger the powerful heater heats the tip to 350°C (660°F) within seconds. Only hold the trigger long enough to get the tip up to temperature. On time should never exceed 12 seconds.

The three interchangeable tips that are included make it ideal for a variety of different sprue types. Tips slide on and off the heated end and are secured in place with lock collar. Other tips available.

## FEATURES:

- ALL COPPER TIPS FOR BEST HEAT TRANSFER
