

# BULLET MAGNETS

## SUPER POWER - RARE EARTH MAGNETS FOR JUST-IN-TIME LOADERS

**5  
MODELS**

The PPE Bullet Magnets are Super Power Rare Earth (Neodymium-Iron-Boron) Cartridges welded to a stainless steel wire ring. They are designed to be suspended in the center of the sight glass tube of your hopper loader to catch and hold tramp ferrous metals. This position allows you to inspect the magnet for metal build-up. The magnet will not interfere with your proximity level control switch. The stainless ring can be bent to suit your required diameter for the correct suspension height.

### FEATURES & BENEFITS

- Longer lengths for more magnetic surface area.
- Two magnet diameters, 1 inch & 5/8 inch.
- Five sizes to fit most sight glass throats.
- Sealed welded construction.
- Super power rare earth magnet.

Ring can be expanded or contracted to vary mounting elevation.
