

VACUUM HOSE CONNECTORS

VACUUM HOSE SPLICERS - STEEL OR STAINLESS STEEL

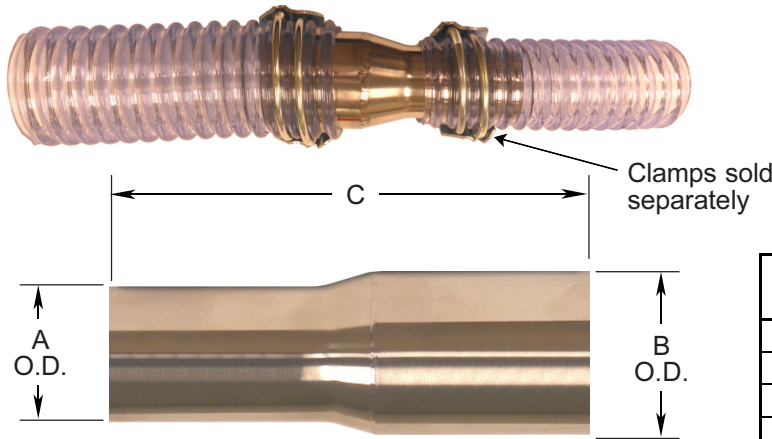

- 2 types available: Steel (EMT Tubing) or Stainless Steel.
- Ends are slightly chamfered on the inside.
- Both types in stock.
- Thin wall section tubing avoids trapping fines or powders.
- 6" length permits the use of two clamps per side for greater sealing.

We suggest you always use a one piece hose to eliminate joints along your vacuum hose lines. However, if you must splice, use our thin wall splicers.

30° Y- ADAPTORS - SPLITTERS - ALUMINUM OR STAINLESS STEEL

Split your material flow. These welded aluminum or stainless steel 16 ga. Y-Adaptor pipes are excellent splitters for vacuum systems. The rigid heavy gauge thin wall construction is designed for use with vacuum hose and/or material transport tubing systems. The thin wall reduces the chance of trapping beads or fines.
